

**Dawn:** city awakens

**Day:** the best views

**Twilight:** the colours of sunset

**Night:** city light show

**Would you like to watch Sydney's twinkling lights by night or enjoy the Bridge and surrounds in the full light of the day? Alternatively a dawn or twilight Climb may allow you to experience a little of both. Whatever time you choose, BridgeClimb is one of the most memorable things to do in Sydney.**

#### **Dawn**

For early adventurers, exclusive dawn Climbs are offered on the first Saturday of each month. Dawn Climbs have a tranquil and pristine quality. Watch from above as the lights fade and the city awakes like an enormous, animate machine. The city seems calm, the Harbour glistens, and you reach the summit just as the day emerges from the night.

#### **Day**

Climbing during the day with the city buzzing around you has an energetic, vibrant feel. Standing on top of the Bridge in the centre of Sydney Harbour, you'll take in the sights of the Sydney foreshore and the World Heritage listed Sydney Opera House. As the sounds of the city, trains and traffic filter up from below, a clear day will afford you views that stretch from the Pacific Ocean to the Blue Mountains. Climb Leaders will point out key landmarks that can be seen from on top of this great icon.

#### **Twilight**

The colours of twilight add an element of romance to your journey as you watch the magical lights of Sydney flicker around you. The city's dusk sky is truly breathtaking alongside the Bridge's powerful structure. There are two options for climbing during Twilight. You can experience the transition from day into twilight (Early Twilight), or twilight into night (Late Twilight). On either Climb, you will begin your ascent in daylight and descend at night with full NightClimb equipment provided.

#### **Early Twilight**

After embarking on your Climb in the afternoon, you will reach the summit as the sun begins to set. As you arrive on the western side of the Bridge the sun will have reached the horizon and evening will emerge.

#### **Late Twilight**

Emerge onto the Eastern arch as the sun falls to the horizon. As you descend from the Bridge you'll experience the lightshow of Sydney at night. Both Twilight experiences are extremely popular so it's a good idea to book well in advance. Twilight Climbs can be booked online, however if you have a stronger preference for one of the two Twilight experiences, please contact the Ticket Hotline.

#### **Night**

A NightClimb has a character all of its own. There's a quiet, magical quality to the city at night and the Bridge has a mysterious feel as you make your way to the summit guided by the light of the specially provided headlamp for NightClimbers. You're wrapped in a blanket of darkness, with just the Bridge lights illuminating the structure against huge shadows. Then, at the top, Sydney blazes before you in an electric-light show.
